Preparing sport management students for a future career is the ultimate goal of each sport management program. The following assignment is utilized to engage students in career preparation prior to completing an internship in the industry. The assignment is composed of four parts. Students begin by writing an autobiography detailing the career of their dreams. Next, students conduct an informational interview with a sport professional working in their ideal role. The student then creates a cover letter and resume for an entry level job within the sector. Finally, the student engages in a Zoom interview with their instructor.
