Abstract 2021-160
Mode: Synchronous
Friday June 4, 2021, 2:05 PM - 3:05 PM

This presentation describes an assignment where a problem-based learning approach is employed to challenge students to critique existing policies and procedures within youth sport organizations. Specifically, students are tasked with conducting an audit of the existing policies of the youth sport organization of their choice in order to understand how the organization addresses the intersection of sport with broader social issues (e.g., discrimination, economic inequality). Within their audit, students are to offer updates to existing policies and procedures in order to address any shortcomings that they find.
